Professional Summary

Full Stack JavaScript Developer with experience building modern web applications using React, Next.js, Node.js, and multiple databases including MongoDB, MySQL, and PostgreSQL. Skilled in developing REST APIs, authentication systems, and responsive user interfaces. Experienced in working remotely and delivering scalable web solutions.

Skills

Frontend: HTML, CSS, Tailwind CSS, JavaScript, TypeScript, React, Next.js

Backend: Node.js, Express.js, Prisma ORM, TypeScript, JWT, REST API Development

Database: MongoDB (NoSQL), MySQL, PostgreSQL

Tools: Git, GitHub, Firebase, Postmen, VS Code

Professional Experience

Remote Full Stack Developer

Remote Development Team — 1 year

- Developed and maintained full stack web applications using React, Node.js, and MongoDB.
- Built REST APIs and integrated databases for dynamic data handling.
- Implemented authentication systems for secure user access.
- Collaborated with team members remotely using Git and GitHub.
- Improved application performance and optimized database queries.

Projects

Agency Website & Office Management System live link code

Tech Stack: Next.js, TypeScript, Tailwind CSS, ShadCn

- Implemented employee activity tracking UI to monitor login/logout times and daily attendance records.
- Built role-based dashboard interface (Admin, Manager, Staff) with conditional rendering and protected routes.
- Developed course browsing and enrollment UI with integrated Stripe payment flow for secure checkout experience.
- Created interactive admin panels to manage employees, attendance, salary status, and system data visually.
- Note: Click the **Login** button in the footer to access the system.
  Email: admin@gmail.com , manager@gmail.com , employ@gmail.com password:12345678 for all user

Courier Management System (Frontend) live link code

Tech Stack: React, Tailwind CSS

- Implemented role-based dashboards (Admin, Rider, Branch) with conditional UI rendering.
- Built protected routes to ensure secure access based on user roles and authentication state.
- Designed dynamic sidebar navigation with role-specific menu items and active state handling.
- Developed fully responsive UI for seamless experience across mobile, tablet, and desktop devices.
  Note: Rider panel complete

Healthcare Platform (Backend) code

Tech Stack: Node.js, Express.js, PostgreSQL, Prisma, TypeScript, Zod, Stripe

- Implemented secure authentication system using Better Auth with role-based access (Admin, Doctor, Patient).
- Built appointment management system where patients can book doctor schedules and confirm via Stripe payment integration.
- Developed prescription system enabling doctors to create prescriptions and automatically send them to patients via email.
- Designed robust API with Prisma ORM and Zod validation to manage users, health records, schedules, and profile updates securely.

Education

Higher Secondary Certificate (HSC)

Nazipur Government College
